SUMMARY

SCIENCE AND EDUCATION

V.B. Krisa. About the Integration in Education

The development of the modern scientific cognition is characterized by the differentiation of sciences combined with the synthesis of scientific knowledge, the transfer of the research methods from one sphere into another and also with the integrative processes in the social mind. Due to this the integration becomes the main principle of the scientific knowledge. This postulate helps to understand the rules and prospects of the development of the modern higher education.

A.M. Khadykin, N.V. Ruban. Benchmarking in quality management of high school educational process

In the article the problems on the use of benchmarking as a tool for the resolution of tasks on educational process quality of high school are discussed. The internal and external benchmarking is considered. The offers on the use of benchmarking in high school are presented.

HISTORICAL SCIENCE

M.A. Garkusha. Settlements and habitations of Tara Tatars: functionality and meaning

The settlements and habitations of Tara Priirtysh'ya XVII-XVIII centuries are examined on the basis of archaeological, ethnographic and printed materials in this article. The semantic and functional constituent of the habitations is exposed in the work. The analysis of the hands-on situation at Tara Priirtysh'e shows, that this aspect is studied.

B.B. Mongush. The Chiqs: the origins and role in ethno genesis of the Tuvan people (according to Eastern written sources)

The article is devoted to the problem of the Chiqs ethnoses' origins, their localization and participation in ethno genesis of the Tuvan people on the base of the analysis of the information Ancient Turkic and Chinese written sources and linguistic data. In this article have been generalized all information about the Chiqs, and etymology of their ethnonym was considered in a new way on the base of the Yenisei languages. Basing on such etymology it has been offered an alternative point of view to some problems in the history of Tuva and ethno genesis of the Tuvan.

A.Kh. Khizriev. Egypt in foreign policy of great States in the 50-s – the beginning of the 80-s of 19th century

The article is dedicated to the definition of the place of Egypt in the foreign policy of European great States in the mentioned period when the problem of Suez Canal assumed an international importance and England won a victory in the colonial struggle over other imperialist rivals.

E.P. Belonozhko. Struggle of society against children's social pathologies in post-reform Russia (historical experience)

The article is devoted to the study of one of the problems insufficiently studied in domestic historiography, connected with the struggle of a pre-revolutionary Russian society against children's social pathologies, studying historical experience with juvenile criminals, vagrancy and prostitution of minors, preventive maintenance given of not social the phenomena.

E.V. Sokolova. "New local history" and exploration of Omsk region cultural area of small towns in Soviet period oftimes

In this article an attempt is made to analyze the opportunities of one of the promising lines in a contemporary science – "new local history" – cultural area exploration of Omsk region's small towns in the Soviet period. Methodological approaches of "new local history" are examined in comparison with the prevalent traditions of state of local lore. New particular conclusions obtained as a result of the research work are published in this article. These conclusions illustrate the opportunities of exploration of Omsk region's small towns through the problem field of the "new local history".

N.Yu. Stepanova. Establishment of facilities and equipment of regional TV by the example of Izhevsk television center (1950-1980)

The main subject of the article is the history of Izhevsk TV studio facilities and equipment basis establishments and the challenges faced. This problem is studied on the basis of archival sources which were not published earlier.

A.S. Sarsambekova. Content – analysis of newspapers of the Omsk region

The author discovers the content – analysis of newspapers of the Omsk region and determined the degree of tolerance of the stereotypes and ideologies about Kazakhs. She establishes the causes and the character of non-tolerance information in the newspapers of the Omsk region.

O. Zubcova. Representative bodies of city's self-government during the constitutional crisis in Udmurtia in 1996–1997

On the basis of archive documents of municipal institutions there was held the local representative body's activity of Udmurtia towns during the political confrontation with the supreme body of legislative power (the State Council) of Udmurtia Republic in 1996 – 1997. The factors which caused the politically independent position of the Duma of Izhevsk city are established.

SOCIOLOGICAL AND ECONOMICAL SCIENCE

Y. V. Lunina. The trends of the major development policies of social support for the youth in contemporary Russian society

The importance of the research on the main trends of the youth social support appears to be especially significant due to the transformation of the forms of the social support, the reduction of the role of the conventional institutions of socialization, the change of social values of the youth. In contemporary Russian society the highest priority is given to the problem of social support of the young people. The results of the research are scientifically new because the priority policies of regional youth policy are revealed; the theses and conclusions that further optimization of regional social support organization are developed.

E.A. Kosmina. Cultural capital as a driver of economical development

In the article one of the most wanted modules of the cumulative capital of society - cultural capital functioning in all the areas of human being activity is considered. The evidences of the cultural capital as fundamental basis of economics, political and social institutes are given.

O.I. Litvinova. The problems of teachers' labor intensity evaluation in higher education institutions

The article deals with the problem of evaluation of worker's labour activities. During investigation it was stated that the great attention is paid to studying labour intensity in budget sphere, but the intensity of labour is not evaluated in budget organizations and particularly in higher institutions. It is necessary to do a research in this sphere in the future.

V.D. Polezhaev. The ways of improving the system of teacher's salary accounting

In this article the system of teacher's salary accounting based on a single tariff rate system is investigated by means of graphic and analytical methods, we give reasons of necessity to improve it. There are specified concrete recommendations how to determine a level of payment and an order of its indexation in budgetary organizations.

A.Yu. Kon'shunova. The peculiarities of strategic personnel management depending on environmental dynamics

The appreciation of personnel management surroundings' dynamism depends on the rate and degree of surroundings' factors changes. Basing on the analysis of dynamism the four degrees of dynamism were distinguished. More over, the conformity of these degrees and the types of strategic personnel management system was established.

M.Yu. Dityatkovsky. Obligatory transmission of material resources and financial assets to the organs of local self-government providing individual state authorities

This article is dedicated to the problem of obligating of transmission to the organs of the local self-government some

material resources and financial means, which are necessary for the individual state authorities.

PHILOSOPHICAL SCIENCES

Yu. V. Gulyuta. Hermeneutic version of the world history end (gnoseological view)

The author of the article turns to the conceptions of the philosophers who concern the problem of the world history end. In the named conceptions the history is considered not to be the events taken as a whole) but to be a text that must be read. When you finish reading this text the world history ends. The works of H.G. Gadamer, R.D. Kollingwood, M. Haidegger, K. Jaspers are analyzed in this article.

I.C. Akulova. The ontological basis for creation of ideas about finiteness in the philosophy of history

The article proves that ideas about finiteness are typical for many concepts in the philosophy of history. The author considers that reasons for this can be found in the existence of a man himself, in the deep grounds of his consciousness. Motives about finiteness are typical for the prehistoric forms of human consciousness as well – for mythology and religion. Realizing their own finiteness, finiteness of all social and natural processes and phenomena, people consider human history finite as well. Many philosophers pointed that history makes sense only in case when it is finite.

O.S. Gryaznova. The Specificity of Social and Humanitarian Knowledge in the Context of the Explanatory Principles of Teleology and Causation

The article is devoted to one of most important problems in modern educational process, namely actual problem of the finding of specificity of the humanities and the social sciences, in contrast to the natural sciences. It is described in the light of the correlation between teleological and causal relationship, which are examined as the principles of the scientific explanation.

D.M. Korobko. The verbal and non-verbal types of communication in I.A.Ilyn's philosophy of culture

The complex analysis of the culture philosophy by the Russian religion philosopher Ilyn lets us point out the slightly studied aspect of his philosophical creative work. Verbal and non-verbal types of communication are represented by the notions dominating in his philosophical concepts. These notions are «inner spiritual culture of the personality» and «world outlook and apprehension», «sense of life values of communication», and so on.

A.O. Belous. Philosophical conception of K.D. Kavelin

I would like to tell you a few words about my article. I am working at the problems of the Russian social Philosophy. The subject of my article is devoted to a Russian philosopher K.D. Kavelin. The subject is actual nowadays, because soviet scientists didn't investigate the creative activity of my philosopher, who supported monarchy. The aim of this article will be to prove that Kavelin's contribution of such well known philosophers as S.M. Solovjev, V.O. Kluchevskiy and others. Hope that my research work will be helpful for other scientists.

V.D. Lazarev. About the method of philosophy of transitional period in development of society

In this article the author has carried out a short analysis of the main methodological approaches in social-philosophical study of contemporary Russian transitional society.

A. E. Shiryayev. Utopian in the theory of stable development

The theory of stable development, as well as the term "stable development" itself, has been widely spread in science and other areas of social life. In the article, the basic ideas of the theory are construed in comparison with some contemporary tendencies of social development, thus revealing several conceptual problems in the theory of stable development. Among the most important ones is the problem of contradiction between the theory of stable development and some views on historical process, in particular, with the civilization approach. Author analyzes dominating tendencies in the global economy, such as sovereignty, unevenly spread welfare, inevitability of choosing between universal or private goals etc – the tendencies that complicate implementation of the basic idea of the theory of stable development: the universal strategy of surviving. The peculiarities of the discrepancies revealed by the

author are connected to the present technogenic culture, the culture of consumerism, peculiar to modern society. Thus, despite of some circumstances suggesting possible application of the model of stable development, the process of approaching this stable development itself is rather problematic, which makes the whole conception unrealistic.

M.V. Kimmel. The essence of globalization and the main phases of its comprehension

This article provides more precise and concrete definition of globalization and determines its meaning. The author tells us about the main steps of this process. The main object of the research is to clear out all the aspects of the globalization definition and show varied attitude of Russian and foreign specialists to this problem.

L.A. Yashkova. The phenomena of the suicide as a kind of catastrophe

This paper is about a suicide to be defined by the concept of catastrophe. The multitude changes of life conditions drive the system to the crisis. This state of crisis contains some versions of the further development of the system. The movement to the greatest integrity is the one of the directions of development. The suicide is the other direction of this process. Also in this paper the author describes the peculiarities which inherent to the choice of the suicide as a possibility to come out of the crisis and the suicide as a kind of catastrophe.

E.V. Klevtsova. The evolution of the theory of human wants

The article considers the evolution of the theory of human wants starting from the primitive to modern society. The author analyses two peculiarities of the wants – essence and existence. The author defines the notion "wants" and discovers its evolution and impact to society.

This article gives us the opportunity to comprehend the nature of the Ideal in its cultural and philosophical notion. So, the common notion of the Ideal are analyzed in the given article. The article proves the necessity of the comprehension of this notion in connection with the main principles of the philosophical outlook and with the principles of the cognoscibility and human existence in particular.

As for the content, the article gives the main characteristics of the Ideal such as universality, perfection, freedom, value, humanity, imperativeness, appreciation.

The author does the comparison and finds out on the one hand the differences between the Ideal and the Truth, the Aim, the Idea, the Value. On the other hand the author shows that the problem of their relations should be solved by their correlations and their interrelations, by their supplement.

N.A. Zhdanova. Ethic fundamentals and semantics of discipline

Based on the analysed philosophic-cultural and linguistic material some structural elements of discipline (obedience to order in conformity with social norms) are defined and also semantic description of concepts which express certain deviations from these norms and form semantic gradations ranged according to decreasing or increasing one of the elements of discipline is presented.

E.N. Davyborets. Manipulation of consciousness in the image of political leader

In the article the author examines technologies, which are used by the political technologists to create images to the political leaders. The analysis of these technologies reveals the presence manipulative structures. The author results examples of wide application of manipulations in the modern political leaders' mindset of Russia and the USA – to Boris Yeltsin, Vladimir Putin, Bill Clinton and George W. Bush. At the same time, the research shows, that designing images of American leaders, as against the leaders of Russia, the technologies appealing to the reason of the voters are widely used also.

PHILOSOPHICAL SCIENCE

A.V. Buskina. The principal aspects of the religious concept of «the beginning of time» in the light of Qumran's community ideological views (in 196 b. c. e. – the first half of the I century a.d.)
