M. Yu. Kazaryan

Peculiarities of Social Conceptions about Professionalism

The research of social ideas about professionalism shows necessity for maintaining professional acme qualities and difference between implicit conceptions of students of different sex, professions and life goals level.

HISTORICAL SCIENCE

Ya. A. Siritsa

The historical comparative analysis of the purposes of Public employment service in the USSR and Russian Federation

The transition of the Russian state from the centralized system of management to a market economy should be reflected in the sphere of social-labor relations. Changing of social and economic structure has aggravated the problems of employment, has returned unemployment in the Russian society 60 years later. It was necessary to reconstruct Public employment service, which has been created in the USSR and liquidated by 1930 as superfluous — it had made the business - unemployment in the USSR has been completely liquidated. As far as the purposes of the Russian Service of employment coincide with the purposes of Soviet and whether they coincide basically - the author should find out.

A. V. Novichkov

The Problem of the Pedagogical Personnel in the USSR in the '30 of the XX

The purpose of the work is to analyze the situation concerning the pedagogical personnel in the USSR during the thirties of the twentieth century. Another subject of the work is the personnel policy of the People's Commissariat of Education and the A.S. Bubnov's activity in this sphere. The problems of the training of the pedagogical personnel were considered to be of great importance of the noted period. This fact is conditioned by the process of the introduction of the universal compulsory primary and seven-year-old education. The quantity and quality of the pedagogical personnel affected both the period of carrying out the reforms of people's education and its successful accomplishment.

D. V. Pluyiko

The problem of «white» terror in Siberia in the works of first soviet historians of Civil war

In this article is observing of a process of appearance a development of scientific views of soviet historians of 1920-th years on a problem of «white» terror in Siberia. The author analyses the methodology and actual results of researches of the first soviet historians. Nowadays researches of these historians not only are undergone reevaluation, but used by modern scientists.

A. A. Kienkov
