SOCIOLOGICAL AND ECONOMICAL SCIENCE

E. A. Kosmina, E. P. Kukel

The genesis and evolution of theoretical perception of a notion «Capital»

The authors consider not an absolutely correct word collocation «the human capital» being definition of the synonym of category «labor». All nowadays institutionalization of the form of the capital by the criterion of the origin are human. All «family» of the capitals would be more correct to unit by one name «the cumulative capital of a society», special place in it having defined personal to the capital, for only holding as such person can be characterized by those or other kinds entered in the person of the capital.

E. A. Kosmina, V. A. Vaneyev, E. V. Chepurnova

From production function Cobba-Duglas to production function of nano-economic object

In the article certain evolution of production function Cobba – Duglas describing linear dependence of volume of a total product as functions from the factors of manufacture-work and capital as arguments is considered. This first tool model of economic growth further was corrected, the horizon of arguments of function constantly extended, that is quite natural, taking into account that immutable circumstance, according to which the economic growth is influenced by huge quantity of the factors of a not economic origin.

E. S. Alexandrova, E. A. Kosmina, E. V. Chepurnova

To the problem of well-being standard assessment

In the article the various approaches to definition of a level of individual and public well-being are generalized. The modern theoretical landscape of the economic theory of well-being is examined. The model set of parameters of a standard of well-being is offered.

L. N. Kibardina

The evolution of notion of bureaucracy's social nature

In this article analyzed the evolution of notions about bureaucracy's social nature in the social philosophy and sociology beginning with K. Marx's class approach in the definition of bureaucracy, overcoming class approach in the sociology by M. Weber, who consider bureaucracy with ideal type of dominion given a law to disposition of «proper human» resources also an interpretation of thesis by K. Marx and M. Weber in the modern industrial technocracy conceptions.

O. B. Belykh

Technologies of social rehabilitation

In condition of growth of uncared children and youth in Russia the important meaning acquires their social rehabilitation. One of the directions of rise of this activity efficiency is its technologization. The author points out ten rehabilitation technologies: program-aid, communicative, relaxation, estimation, labor, tutor's, training, patronage, and also the technologies of forming new living sphere and forming of judicial sphere.

P. N. Voinov

Living sphere of students as supposition and factor of social prevention

Prevention efficiency of social deviations among students is mainly based on the fact, how much the peculiarities of the students' living sphere are taken into consideration; how broad and actively the regulative potential of this sphere is used. In the given article the results of social investigations, carried out in 2006-2007 years among the different categories of Belgorod students and also the minority, who are registered in police, are generalized.

PHILOSOPHICAL SCIENCE

O. N. Tkachenko

CULTUROLOGY, STATE OF ART

A. A. Tomasheva

Nature of synesthesia and its development in children at lessons of music

The phenomenon of synesthesia often is used in musical pedagogics. The nature synesthesia is defined by connection between a vegetative condition of an organism, the sound nature of music and the form of expression of this nature in speech and representations. The research of synesthesia rate will allow music teachers to coordinate the state of children and organize their classes effectively.

N. V. Goryutskaya

The death aesthetics in the lyric poetry by Valery Brusov

The article is devoted to the investigation of the topos of death. The analysis of lyrics leads us toward the conclusion that the urbanization mechanism destroys its living spirit, but demonic beauty of the lyrical hero conduces to its dearth. In that way, an aesthetic origin in the works of Brusov contains the zeal for destruction.

Информация

I Международный съезд профессионалов инновационного менеджмента

пройдет в Московском Центральном Деловом Клубе «Собрание» (26 – 27 июня 2008 г.).

Съезд фактически становится первой в России дискуссионной площадкой лидеров инновационного менеджмента, которая целиком сосредоточена на вопросах организационно-управленческих инноваций. Поддержку в проведении оказывают международные ассоциации: ISPIM (Международная Ассоциация Профессионалов Инновационного Менеджмента) и Global CTT Network.

Цель съезда

Глобальная и важнейшая цель съезда заключается в том, чтобы сократить разрыв между теорией инноваций и практическими вопросами инновационного управления. Для этого мы будем обсуждать последние тенденции, современные модели, методологии, методы и подходы, которые могли бы быть успешно реализованы на существующих предприятиях.

Среди ключевых вопросов съезда

- Инновационная стратегия Евросоюза: место в ней инновационного менеджмента и организационной культуры.
- «Три арены» компании-инноватора: какое место инновационная организационная культура занимает в корпоративных инновационных процессах? Кейсы.
- Модели инновационного менеджмента и практика: как эти модели работают в успешных компаниях? Кейсы.
- Разработка новых продуктов: Stage-Gate методология и ее практическая ценность для компаний. Кейсы.
- Методология ТРИЗ: как она работает при решении инновационных задач.
- Ключевые компетенции директора (менеджера) по инновациям (CIO).
- Место CIO в организационной структуре компании.
- Программы подготовки профессионального менеджера по инновациям: Инновационный менеджмент в университетском образовании и корпоративные программы подготовки CIO.
- «Дорожная карта» инновационных процессов в компании как инструмент для CIO.
