SUMMARY

SCIENCE AND EDUCATION

S. L. Timkin. The results and challenges of virtual methodical associations of teachers in Omsk region

The article is devoted to a real problem: the usage of information and communication technologies for methodical support and professional growth of teachers, creation of professional communities of teachers in the Internet. For the first time, the principles of construction of network community of teachers as a social - professional network are formulated. On the basis of these principles the concrete recommendations of construction of the professional - social network of pedagogues in Omsk region is planned.

HISTORY

D. V. Khazova. Political monitoring of results of elections of legislative authorities of Omsk region and Altay territory in 1994 – 2002. (The comparative analysis)

On the basis of the objective scientific analysis of process of formation of bodies of legislative and representative authority in Omsk region and Altay territory for the period of 1994-2002 it is established, that considered regions, being in one, the Siberian Federal district, have as the general, and distinctive features of election campaigns. From 1994 though 2002 the mood of electorate, and as consequence, composition of deputies is varied.

I. K. Shabanova. The peculiarities of the judicial HR politics and the judicial proceeding in the Tyumen region in the of totalitarianism forming conditions

On the basis of the early secured documents poor investigated problems of the historical-loyal science are disclosed, which deal with the dependency of the judicial system from the authorities (the influence of the leading party bodies on the human resources politics and the executive politics), and some deformations are traced in the judicial system functioning on the regional level.

E. R. Khairullin. The reformation of UN peacemaking activities from 1992 to 2007

After the Cold War the UN increased its peacemaking activities that led to reform of UN's peacemaking institutions. But it didn't bring effective results in the first half of 1990-s and the reform of UN peacemaking goes on in the new century.

A. E. Nevakshenov. Discussion on critical realignment in American political history of 1970-80s

This article focuses on American «new political history» through comprehensive analysis of the key discussion on critical realignment. It provides the comparative research of different approaches to the problem in question and common features of historical science in this field.

M. E. Yaremenko. The role of «Administrative problem» in formation of Siberian regional identity by private Siberian newspapers of 1870-1880s

On the basis of non-official Siberian periodicals of 1870-1880s analysis the article demonstrates the matter of the «Siberian administrative problem» and variants of it being solved by the writers of private newspapers. It shows the meaning of the Siberian officials' negative image formed by the regional press in the explanation of backward unequal position of Siberia in the Russian Empire.

A. V. Tolstikov. The research and development activity in general schools of Irkutsk in 90's.

They are proved on the ground of our conducted research, that there were wide possibilities in Irkutsk region for the development of pupil's and teacher's creative abilities, which were realized in the deserving ways. The pupil's desire for the research activity got more from year to year. As the result of the research activity the pupil's interest in the independent getting of knowledge, in the holding of practice researches, in the successful trade self-determination raised and that promoted

the development of cognitive, organizational, communicative and research competence.

N. A. Mikhalev. Yamal-Nenets Autonomous region population during the Great Patriotic war: main trends of reproduction

The article explores various issues of Yamal-Nenets Autonomous region population replacement during the Great Patriotic war. Not having exerted serious influence upon age structure of the region population the war deformed its sex composition considerably. Forced female sterility resulted in man power decreasing during all the war period. Indirect casualties brought about by the birth's deficit was around 2260 people. Similar trends can be traced in mortality processes – its relative indices were decreasing alike.

G. Yu. Laznovskaya. The world Paris exhibitions in 1889 and 1900: the impressions and commentaries of the Russian representatives of the culture

This article presents the impressions commentaries of the Russian representatives of the culture at the end of the 19-th century about the world Paris exhibitions in 1889 and 1900.

This article is based on the letters and memoirs and presents these impressions for the first time.

The materials of this article will be usful for historians, culturologiers and for everyone who is interested in the history of the culture.

E. Sh. Efimova. Some «noble» jobs for women in Great Britain, 1870-1900

In the last third of 19th the working opportunities for middle-class women were limited by few occupations, appropriate for «gentlewoman». The article reveals additional and rare-mentioned in historical writings ways of earning money for women, which didn't require special knowledge. The research issue, working activity of middle class Englishwomen of this time period, appears for the first time in Russian historical publications.

I. A. Gataullina. The nutrition of city and village population of Middle Volga region in 1920-es

On the base of nutrition data's analysis it is determined the dynamic lines of consumption of population of Middle Volga region at the period NEP. Due to the level of physiological norms, the calculation of main components of caloric content is produced. And the decrease of caloric content caused the hunger in the region for the first time and the increase of it caused the stabilization of food atmosphere by the middle of 1920-es. It is founded that the nutrition is the reflection of economics condition, while the weakening of regulating functions of government satiates the food market and its intensification leads to its impoverishment.

E. M. Bezhan. Legislation of marriage in Old Believers and its peculiarities in West Siberia in the first half XIXth century

In this article the legislation of marriage of old believers is analyzed. The peculiarities of the practical implementation of the governmental course in this sphere bound up with outlying position of the region and specification of the Siberian body of administration in the first place are revealed. The final conclusion about the difference of West-Siberian variant of autocratic policy and theoretical program of the centre pretends to scientific novation is given.

N. M. Beloborodova. Pre-wedding native Orthodox traditions of Russians in Predbaikalye

The article concerns first pre-wedding orthodox traditions of forming Russian old believers' families in Predbaikallye. The author introduces unique notes and works by ethnographers and scientists giving the retrospective analysis of wedding relations. In the article one can find out why it wasn't impossible to divorce while being married. The results of researches are given both at the international and regional conferences, Russian competitions of pedagogical programs in the field of education and culture.

The article is intended for philologists, ethnographers, specialists of folklore.
