Speech-and-thought process is a complex of intellectual processes, including thinking and speech. It is made up of three stages: thinking, inner speech and outer speech. Inner speech involves two types of conceptions: denotates and predicates. Translating is represented as a result of the following operations: covering a number of limited propositions of the text being translated, and then the translator creates a new wider text on the target language based upon initial propositions.

Keywords: Translation, speech-and-thought process, interiorization, exteriorization, proposition, unit of translation.

Aesthetic perception in students of decorative and applied art courses

The given article touches upon rather actual subject for modern pedagogy and psychology — the problem of the students' aesthetic perception at the decorative and applied arts studies. The author analyzes the conception of the «aesthetic perception» relying upon the theoretical works made by well-known pedagogues and psychologists and comes to a conclusion that the aesthetic perception is the process of purposive action; it is the develop-

ment of the ability to percept and see the beauty in art and in life and to appreciate it. Another aim of the aesthetic perception is the development of the aesthetic tastes and human ideals. At last the aesthetic perception is the development of the ability for the original creativity and the creation of the beautiful.

It should be observed that the author of the article stresses the important role of the folk and decorative and applied arts in the individual aesthetic education and gives the sayings of many Russian examiners of decorative art. The author fairly considers the aesthetic perception to contribute the harmonious development of the personality.

Keywords: aesthetic perception, decorative and applied arts, ability, aesthetic taste, ideal, creativity
