Keywords: integrated mathematics concept, interdisciplinary and intradisciplinary connections, systems approach

O. B. Smirnova, V. A. Stukalov
Competence approach to teaching students of mathematics and how it helps them become highly-motivated in their studies

One of the main reasons of future land-use-planners' negative attitude to mathematics is low motivation and lack of awareness about the importance of deep knowledge of the subject for their future professional activity. The problem can be resolved by making mathematics more practical, e.g. by setting professionally-oriented mathematical tasks. Teaching mathematics in close relation with students' major interests, in our opinion, will increase motivation and therefore improve students' knowledge of mathematics.

Keywords: competence approach, motivation, integration.

N. Yu. Razhina
