The problem is considered on crossing of the external and internal welfare environment which structure is defined by variety of factors. As a result of the analysis the innovative structure of management school of arts which practical importance consists in opening of new directions in art creativity, significant for region, to introduction of the complex adapted programs, introduction in administrative structure DSHI of department of management on management of the personnel is represented.

Keywords: management structure, reorganisation, an additional education, the welfare and pedagogical environment of region, management of the personnel.

N. V. Minina

The development of additional education by means of extracurricular activities

The article covers the problem of the importance of the development of cognitive interest in the context of general education. The author tries to show the role of extracurricular activities in the development of motivation towards studies. The article points out the necessity to introduce the new pedagogical technologies into the system of the extracurricular activities.

Keywords: cognitive interest, interest toward studies, the system of extracurricular activities

PHYSICAL CULTURE AND SPORT

A. D. Kakukhin, I. V. Koval

Urgent aspects of sportive specialization of students' innovative potential increase

Implementation of the Social order "Creation of competitive enterprises and formation the bases of competitiveness of the country as a whole" is in dependence on the level of inventive and innovative potential of specialists.

Keywords: susceptibility, innovations, predisposition, competitiveness, potential.

V. M. Shulyatiev, O. V. Timofeeva

Model of sports and exhibition performances of the physical education of technical university students

The article is devoted to the rationale for constructing a pedagogical model of sports and exhibition performances by means of which was the integrated use of gymnastic dance tracks. The main tools are selected for cheerleading and fitness aerobics (classic aerobics, step aerobics, funk aerobics), extra-individually tailored strength training (shaping), aimed at correcting the figures.

Keywords: physical education, student, model, training, sports and exhibition performances, cheerleading, fitness aerobics, shaping.

L. Yu. Gushchina

Emotional and valuable attitude of students to participation in mass sports events

The article deals with the question of emotional and valuable attitude of students to participation in mass sports events. The theoretical value of the research is the analysis of concept "value", consideration of educational functions of valuable attitudes in sports, allocation of groups of basic values, etc. The practical orientation of research is presented by recommended methods, techniques, approaches to formation of the emotional and valuable attitude of students to mass sports events.

Keywords: value, emotional and valuable attitude, mass sports events.

A. G. Bubennov, V. A. Salnikov

Relation between motional displays and temperament features of boxers with different level of training

The study shows the relation between motional ability and temperament features of boxers with different level of training. It's found, that the increasing of the physical training leads to integration between motional displays and individual, psychological features.

Keywords: individual characters, motional ability, special training, temperament, extroversion, neurotic, sincerity.

M. D. Baksheev, A. S. Kazyaeva, G. A. Tarasevich

Age features influence on formation of perceptions at young swimmers at the stage of basic training

On the basis of the research the data about age features influencing formation of specialized perceptions at swimmers of 10 – 15 years is obtained. The laws obtained during research can be used as a basis in the course of technical training of young swimmers.

Keywords: specialized perceptions, young swimmers, age features.

S. G. Patrina, V. A. Salnikov

The individual features of age-specific development of 7 – 11 years old girls

The study shows the dynamics of links between the morphofunctional indices, motional manifestations and individual, psychological features of the 7 – 11 years old girls. It is found, that to the puberty the number of connections between the morphofunctional indices and motional manifestations reduces, considerably these connections visualize from the side of the morphofunctional indices and motional manifestations with the typological features of the nervous system.

Keywords: motional abilities, phases of ontogenetic development, functional development, features of the nervous system.

M. V. Shakirova

Civic education of students on the basis of Olympic knowledge

The present article deals with the questions of the regulatory basics in the current state and gives a theoretical overview of methods applied to develop civic consciousness of students. The article also accentuates the importance of Olympic education in this process.

Keywords: Education of students, civicism, Olympic knowledge, Olympic Education.

TEACHING METHODOLOGY

A. M. Shabalin

Virtual computer as innovative means of practical work for the future competitive IT specialists

The practical part of the future competitive specialist's training in IT area is considered in the given article. The necessity of using "Virtual computer" innovative means of programming in the higher education establishments is grounded in the work. The application of the given means of programming is illustrated on the example of the practical work developed by the author.

Keywords: IT specialist's training in the higher education establishments, innovative means of education, laboratory work, criteria of choosing virtual computers.

V. A. Dalinger

The improvement of students' educational process in solving text problems

In this article the essence of text subject problems in mathematics is defined; the functions of the text subject problems in the educational process are pointed out; the typical mistakes, which are made by students while solving these text problems, are analyzed; the reasons, which cause the appearance of these mistakes, are pointed out; some recommendations on avoiding the mentioned typical students' mistakes are given.

Keywords: text problems; the functions of the problems; typical mistakes; universal educational activity; reasons for typical mistakes.

S. M. Andryushechkin

About some tools for activization of schoolboys teaching

Orientation of modern school education to formation of competence of high school students actualizes a question of teaching activization. Effective didactic informative activity of schoolboys is considered in the article.

Keywords: comprehensive school, activization of the teaching of schoolboys.

I. D. Koldunova

About the necessity of development of analytic and synthetic activities of students in Pedagogical University

According to the results of the investigation, we can conclude that the students of Pedagogical University have some problems in analytic and synthetic activities. The organization of the purposeful education by doing the system of exercises on "Theory of Algorithms" using operations of analysis, synthesis and comparison can help to solve the existing problems.

Keywords: the analytic and synthetic activities

Премия имени Андрея Сахарова «За журналистику как поступок» 2011 г.

Премия имени Андрея Сахарова «За журналистику как поступок» присуждается российским журналистам за материалы, которые становятся продолжением жизненной позиции авторов, последовательно воплощаемой в работе на высоком профессиональном уровне, и отстаивают те ценности, которые отстаивал А. Д. Сахаров. Материалы должны быть опубликованы в течение конкурсного срока в российских газетах, журналах, альманахах или Интернет-изданиях. Тексты на языках народов России должны сопровождаться переводом на русский язык.

Жюри конкурса голосованием выбирает пятерых номинантов премии. Лауреат определяется большинством голосов членов жюри и объявляется на церемонии вручения премии.

Премия не присуждается дважды одному и тому же лицу.

Премия может присуждаться посмертно.

Выдвижение претендентов осуществляют редакции газет и журналов и граждане России.

К материалам необходимо прилагать представление соискателя, его адрес и номер телефона. Жюри оставляет за собой право при необходимости запросить дополнительную информацию о соискателях.

На конкурс представляются не более 7 публикаций одного автора. В аннотации к представляемым материалам нужно пояснить, почему именно эти публикации являются поступком.

Рассматриваются статьи, опубликованные в период с 15 октября 2010 года по 15 октября 2011 года.

Материалы принимаются до 1 ноября 2011 года в печатном и электронном виде (на компакт-дисках, или по электронной почте на адреса: fond@gdf.ru). Электронная версия сдается в обязательном порядке.

Печатные версии материалов принимаются по адресу: 119992, Москва, Зубовский бульвар, 4, комн. 432, Фонд защиты гласности, с пометкой «Премия имени Андрея Сахарова "За журналистику как поступок"».

Премия вручается ежегодно, в День прав человека, 10 декабря.

Награды победителям:

Денежная премия лауреату — 5 000 долларов.

Денежные премии номинантам — 4 премии по 500 долларов.

Дипломы — редакциям печатных изданий, опубликовавших материалы победителей.

Дипломы — лауреату, номинантам и финалистам конкурса.

Срок подачи материалов истекает 1 ноября 2011 года.

Информация на сайте Фонда защиты гласности.
